About ExtraBucks

We thought of developing an app that will allow you to rent out any stuff and make some money out of it. Also you can rent in the stuff you are interested in and if anyone else is willing to rent it out. Users can create their own profile in the app, add credit card details and make secure payments. The app provides a platform for a renter and a rentee to rent their stuff, however it is upto them how to coordinate with the other person.

Preliminary Survey:

We conducted a survey where we shared our intent behind our app and checked if people are willing to rent out or rent in stuff within a community to earn some extra money. Our aim was just to see the acceptance of people towards this app, which believe we achieved.

[redacted] This is very neat!! I accessed it from my phone and it looks great! If I was nitpicking, I expected the white arrow to switch from pointing "sign in" to "sign up" when I click on the sign up after clicking "continue with browser"

[redacted] this is really cool! maybe you could add a rating system (I think airbnb uses something like this?) has so people can be rated on how reliable they are 😊

[redacted] I love it, it's simplistic and clean! If I could add anything, it would be a quick introduction/tutorial to new users after the sign up screen, explaining rent out and rent in. It leaves no room for user confusion! I love it though, 5/5 stars :+)
